Inhalation	Move victim to fresh air. Administer oxygen if breathing is difficult. Give artificial respiration if victim is not breathing.
Eye	IF IN EYES: Rinse cautiously with water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice/attention
Skin	In case of contact with substance, immediately flush skin with running water for at least 20 minutes. Wash skin with soap and water. Take off contaminated clothes. If skin irritation occurs, get medical advice/attention.
Ingestion	If swallowed, wash out mouth with water provided person is conscious. Call a doctor/physician. Do not induce vomiting. If person is drowsy or unconscious and vomiting, place on the left side with head down.

Most important symptoms and effects, both acute and delayed

May be harmful by inhalation, ingestion or skin absorption
